

Getting started with your Microsoft Windows device

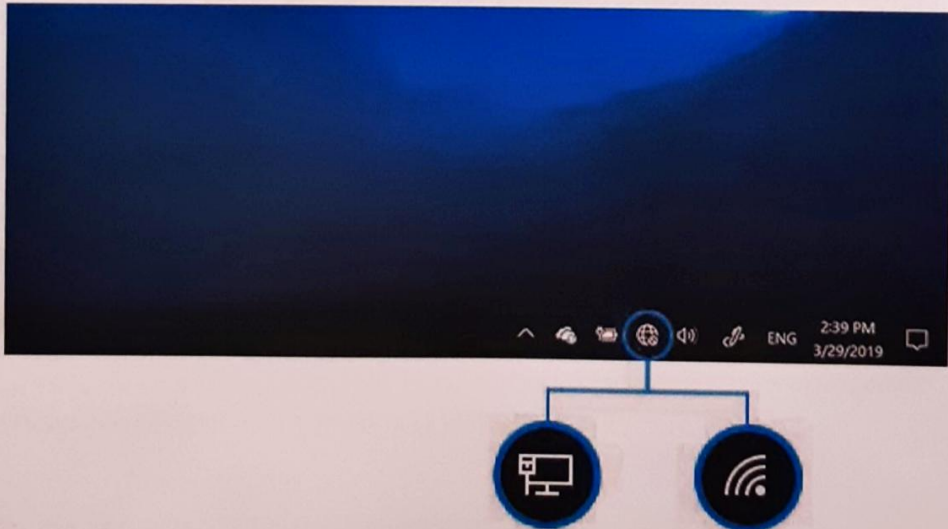

Turn it on

1. Plug in your device to the mains, using the power supply and charger in the box.
2. Press the 'On' button.

Connect to Wi-Fi

Your device needs to access a Wi-Fi network before you can use the internet.

1. Click the Network icon on the taskbar. If you don't see one of these network icons, click the **^** symbol and you should see it there.

2. Choose your Wi-Fi network, then select **Connect**.
3. Type your network password, and then select **Next**.
4. You should choose **No** when asked if you want your device to be discoverable on the Wi-Fi network.

Note: If you've been given a 4G router, look in its box to find the name of the network and the password you'll need. If you're using your own Wi-Fi then connect using the same network and password as you would with other devices, such as a mobile phone.

You're ready to get online

You can start using your device once you're connected to a Wi-Fi network. Your school and/or Local Authority will let you know which resources you should use.

Logging back into the operating system

The devices have no passwords set up. If you've logged out of the operating system, you can log back in with the username ".\localuser". Type the username carefully – the .\ before localuser is part of the username.

Staying safe online

All Microsoft Windows devices registered to the DfE have safeguarding settings applied to keep you safe online.

This means you won't be able to use this device to access any inappropriate content.

If you're blocked from viewing something you think you need for your work or wellbeing, get in touch with your school or local authority contact.

If you're worried that your child is accessing harmful content on any device, you can receive support and advice online at

<https://www.gov.uk/guidance/safeguarding-and-remote-education-during-coronavirus-covid-19>

If your child is worried or needs support, they can call [Childline](https://www.childline.gov.uk) (0800 1111) or download their 'For Me' app.

Privacy notice: mobile device management for the Department for Education's Get Help with Technology programme

How we use your personal information

The Get Help with Technology programme is run by the Department for Education (DfE). This privacy notice explains how it will use your personal information.

As part of the Get Help with Technology programme we need to be able to:

- keep children safe whilst they are online
- locate, disable and delete data from the laptop that is on loan, if it is lost

We've installed mobile device management software on the laptop to do this. The mobile device management solution will collect some personal information when it is implemented on your laptop or tablet.

The Department for Education is the data controller for the personal information collected when using mobile device management on a laptop or tablet provided through the Get Help with Technology programme.

The personal information collected will be:

- a device number for the laptop loaned to you
- your Internet Protocol (IP) address, which is a number linked to a device connected to a computer network
- addresses of websites visited when using the device

For these purposes, the personal information above is securely shared between the Department for Education and the mobile device management software providers (including their contracted partners), under agreements with the Department for Education

Your name is not shared with the Department for Education or mobile device management software providers (including their contracted partners).

When we can use your personal information

To use your personal information we need to meet one (or more) conditions in the data protection legislation. For this service we can use your information as part of our legitimate interest.

How long we hold personal information

Personal information is held by the Department for Education and the protective software providers (including their contracted partners) for up to 2 years.

Who we share your personal information with

We only share your personal information with the protective software providers (and their contracted partners) under our agreement for the reasons described above, unless there is a legal requirement for us to share it.

Your individual rights

Under the Data Protection Act 2018, you're entitled to ask if we hold information relating to you and ask for a copy, by making a 'subject access request'.

For further information and how to request your data, use the 'contact form' under the 'How to find out what personal information we hold about you' section in the Personal Information Charter:

<https://www.gov.uk/government/organisations/department-for-education/about/personal-information-charter>

You can read further information about your data protection rights at the Information Commissioner's Office.
