

Settings for S2S downloads

There have been some problems downloading files from the S2S website. Internet explorer gives an error when the download starts. To enable the download you need to check your settings in Internet explorer.

1. Load **Internet Explorer**.
2. On the menu bar, which looks like this:

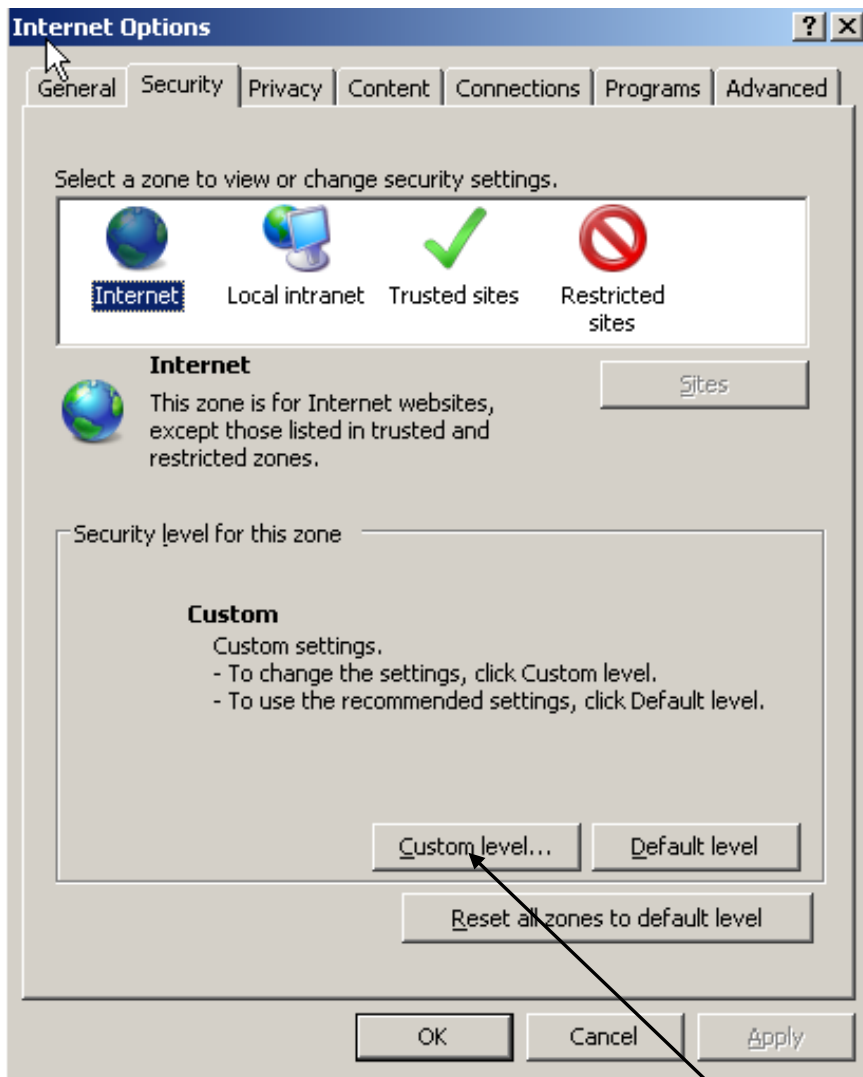

click **Tools**.

Note: If you are using Internet Explorer version 7 then you may not have the menu at the top of the screen. You will have an Icon on the right of the screen

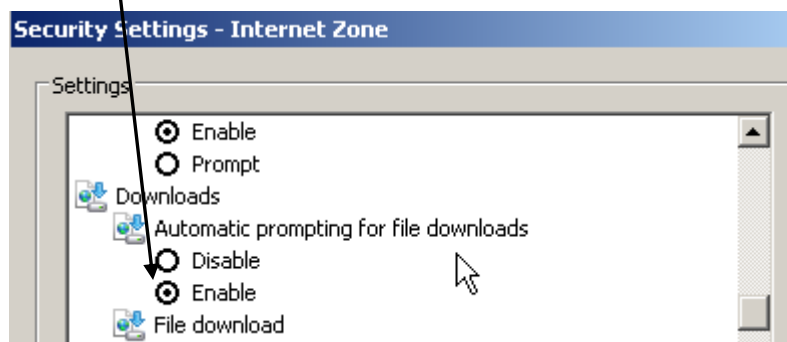

like this...  **Click on this icon.**

3. Select **Internet Options** at the bottom of the dropdown menu.
4. Click on the **Security** Tab.
5. Make sure the **Internet** is selected, like this:

6. Near the bottom of the window is a button labelled **Custom Level**.

7. Click on that button.
8. Now scroll down the window presented to the group of entries labelled **Downloads**.
9. Select **Enable** in the **Automatic prompting for file** section.

10. Click on **OK** button and this window disappears.
11. Click on **OK** button and the **Internet Options Window** disappears.

The file will be downloadable now. You can go to www.teachernet.gov.uk/s2s
