

Audit, Investigations and Risk Management

Wokingham Council offers schools and academy trusts expert support in governance processes, giving you peace of mind and confidence in compliance. Our services include robust internal audits and thorough investigations, ensuring transparency, accountability, and adherence to statutory requirements. By partnering with us, you gain access to trusted local authority expertise that helps safeguard your reputation, strengthen decision-making, and maintain the highest standards of governance.

Schools operate in a highly dynamic environment with multiple sources of risk. Risk management helps school leaders to navigate these challenges in a systematic and structured way and supports the communication to governing bodies.

A risk management facilitation workshop will support schools to identify, assess, prioritise and most critically identify actions to mitigate those risks and effectively exploit opportunities enabling schools to deliver their objectives.
