

Forestry

Keeping your school grounds safe is essential—and Wokingham Council is here to help. Our annual Level 1 visual tree inspection service, delivered by qualified tree inspection officers, helps to ensure you meet your duty of care as responsible land managers.

Based on Health and Safety Executive guidance, schools should have trees inspected every three years, but factors like age, damage, or disease may require more frequent checks. Our service makes this easy: we provide a clear report on the condition of your trees, highlight any health and safety risks, and recommend any necessary work or further inspections that may be necessary. With Wokingham Council's expertise, you can be confident your school is compliant, safe, and well cared for.

Service	Details/Options	Price (VAT will be added where applicable)	Service Specific Terms
School Forestry	Level 1 ground level visual health and safety tree inspection Inspections to be fulfilled and reports to be supplied between April-September. This is to align with optimum Spring and Summer tree inspection timeframes while trees are in full leaf.	£299 POA for schools with more than 15 trees.	One-off sign up in March. Following a Level 1 health & safety tree survey, WBC will advise on recommended safety works. Any safety works recommended to be arranged and funded directly by the school.
